Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 07/31/07 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sahagian et al (USPN 6,299,438) in view of Palmer et al (USPN 6,280,185). Sahagian et al teaches an orthodontic wire used with attachments suitable for bonding on teeth so as to correct a position of the teeth, the orthodontic wire comprising: a wire formed substantially entirely of a titanium-molybdenum alloy (col. 3, lines 45-50) having an outer surface layer (col. 3, lines 56-59 & col. 4, lines 15-19) of a titanium nitride that is free of titanium oxide (col. 3, lines 59-62). However, Sahagian et al does not specifically teach using a titanium nitride. Palmer et al teaches coating orthodontic appliances with titanium nitride. It would have been obvious to one having ordinary skill in the art at the time the invention was made to coat the orthodontic wire as taught by

Art Unit: 3732

Sahagian et al with a titanium nitride to provide an archwire that is more aesthetically pleasing as taught by Palmer et al.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
